

	<p>The use of a single cylinder system is recommended if gas consumption is lower.</p> <p>They are also often used for mobile operations in companies and on construction sites</p> <p>Used for assembly purposes and repairs.</p>
	<p>A single cylinder system consists of:</p> <ul style="list-style-type: none"> <li>• a gas cylinders</li> <li>• a cylinder pressure reducer</li> <li>• If necessary, a safety device with multiple functions</li> <li>• If necessary, a cylinder holder (wall or table mounting)</li> </ul>
